

Swahn Engraving & Imaging can help you with industrial parts marking and ID plates.

In today's complicated world, for safety, quality assurance and liability reasons, it's smart to make sure that every part, every piece of industrial equipment, every electrical box or control panel is precisely and permanently marked.

At Swahn Engraving & Imaging, we have decades of real-world industrial experience and technical know-how to mark your manufactured part, maximize production efficiency and enhance facility safety.

**Product Identification
Indexing
Serialization
Control Panel**

We work with many industrial materials:

**Plastics
Brass**

**Aluminum, anodized aluminum
Stainless steel, tempered and
hardened up to Rockwell 40**

"Swahn Engraving has the ability to take a rough concept and turn it into a masterpiece with little direction. Their delivery always exceeds expectations."

—Senior Supply Chain Manager
